**DGL** DIGITAL PRINTING

Digital printing involves printing paper, with photographic quality. This technique is widely used for labels or pins.

**DOM** DOMING

Doming consists of applying a clear resin (epoxy) on a printed slip. This layer of resin produces the effect of depth and protection and results in a 3D effect. The end result is shiny, resistant and durable.

**DTG** DIRECT TO GARMENT

Textile direct printing is a full colour digital printing technique for textiles, ideal for small quantities.

**DUV** DIGITAL UV

UV printing offers great advantages like speed and high quality guarantee. This technique is very appealing for printing in several colours. Ideal for small quantities and can be applied on plain or slightly curved surfaces.

**EDB** EMBROIDERY

The well-known embroidery technique allows customization on good quality fabrics with great quality and perfection. Embroidery replicates designs with a large variety of colours and distinct lines.

**ETD** 3D EMBROIDERY

A technique that allows you to personalise different types of fabric, achieve a high quality finish and achieve perfection with three-dimensional personalisation in relief.

**FIR** FIRING

Firing is a printing technique where special paints are applied using high temperatures to transfer the logo onto the product. It is ideal for glass, ceramic or porcelain. We have 2 options available: the low temperature, possible for logos up to 10 solid colours; and the high temperature option, that guarantees a longer durability and can be used for black and/or white.

**HDG** HYDROGLAZE

Hydroglaze is a technique that consists of spraying any pantone color, with a matt or glossy finish, onto glass, ceramic or porcelain.

**HTS** HOT STAMPING

Hot stamping consists of reproducing designs by means of a hot press on leather or imitation leather products. Furthermore, this technique allows transferring a metallic or pigment finish, adding color to the branding.

**LAS** CIRCULAR LASER

Laser engraving is a precise and long-lasting method. The laser beams engrave the design on hard surfaces. Besides metal, it can also be used on wood, leather/PU and glass with exquisite and elegant results.

**LSR** LASER

Use of a high-precision laser beam, allowing for low-relief engraving. This laser can be fibre optic, suitable for metals, or CO2, suitable for wood and cork, or UV, suitable for glass.

**PDP** PAD PRINTING

Process used mainly for printing small objects like pens. It is very versatile and adapts to curvy shapes. It is the most economical solution for various products.

**SCR** SCREEN PRINTING

Screen printing is a printing technique which provides trustworthy and long-lasting results. This method can be used on smooth surfaces; printing in high definition even with more than one colour.

**SND** SANDBLASTING

Sandblasting, creates a 3D effect with great detail. This technique is ideal for glass, ceramic or porcelain.

**SRC** CIRCULAR SCREEN PRINTING

Rotary screen printing is similar to the process of screen printing, but optimized for 360° printing. This process is indicated for pens.

**STI** STICKERS

Printing vinyl stickers with photographic quality and a wide variety of sizes and shapes.

**SUB** SUBLIMATION

Sublimation offers the advantage of being able to be used on concave surfaces, producing well-defined designs. It also results in a design highly resistant to extreme temperatures.

**TRD** DIGITAL TRANSFER

Transfer process optimised for digital printing of small quantities, without colour limits.

**TRS** TRANSFER

This method enables results on various types of fabrics and is very economic for multicolour printing on small quantities.

**TXP** TEXTILE SCREEN PRINTING

A method similar to silkscreen printing, however optimized to be used on textiles.

**UVC** CIRCULAR UV

Circular UV is identical to the UV process, but optimized for 360° printing.

# infinitebook

Infinitebook, founded in 2014 within a Portuguese high school classroom, emerged as a response to the limitations posed by traditional pencils, pens, and paper. The founders aimed to promote sustainability by creating a tool that significantly reduces paper usage in everyday tasks. This innovative product combines the familiar, fluid writing experience of a traditional notebook with the easy-to-erase properties of a whiteboard. Infinitebook allows users to write, erase, and rewrite their ideas endlessly, making it a versatile and eco-friendly alternative to conventional notebooks. Today, it has become a global success, serving customers in over 50 countries.

Notes can be scanned

You are helping save:

 **93 420 000** litres of water

 **173** tons of paper

 **1 903** trees

 **1** Infinite Notebook = More than **100** Conventionals

## How to erase the Infinitebook:

### Mini Eraser

On the back of the Infinitebook's marker is an eraser like the one on whiteboards. It helps to erase minor spelling mistakes.

### Damp Cloth

With an everyday cloth dampened with water and well wrung out, you can erase entire pages. This method works best on fresh ink.

### Cleaning Kit

It includes a microfiber cloth, a sponge and an empty spray bottle that you must fill with water. It makes cleaning easy, even on old ink.

# PERSONAL & TRAVEL

## An alliance between tradition and modernity

Ach. Brito is one of the oldest and most cherished companies in Portugal. Founded in the city of Porto in 1918, this century-old soap and perfume company stands out for its tradition and elegance. Its longevity is essentially due to four important pillars: its historical legacy, the beauty of its packaging, its experience in soap production and the quality of its products.

Ideal for daily skin care, making your skin softer and smoother. After 90 years since its launch, Patti soap is considered a best seller and a favourite with consumers. Capacity up to 160 g.
